is a comprehensive guide to the knowledge and skills needed to provide effective and efficient practice within a managed-care context that's focused on a diversified, aging consumer population and high-risk health conditions. This unique book examines the essential elements of community health practice, including logic modeling for planning and evaluation, interdisciplinary collaboration, and the use of technology and telemedicine in social work practice. *Social Work Practice in Community-Based Health Care* presents practical information for social workers in the wake of the insertion of managed care as a "third party" to the relationship between physicians and their patients, and advances in medical care that are transforming previously acute and life-threatening illnesses to chronic conditions. The book offers a critical analysis of available research and model service delivery innovations, applying evidence-based practice to case studies in a style that's easily accessible to practitioners, administrators, supervisors, and social work students. The book also includes glossaries at the end of each chapter and appendices that analyze online resources and address cultural background assessment questions. Topics discussed in *Social Work Practice in Community-Based Health Care* include: the revolution in funding and delivery evolving trends and healthcare needs of the consumer population a conceptual framework for culturally competent practice the nature of social work in ambulatory health a brief history of healthcare social work emerging practice settings the use of new communication technologies in practice methods for evaluating direct practice ethical considerations current community-based programs for culturally diverse and at-risk populations and much more *Social Work Practice in Community-Based Health Care* is an important resource for social work practitioners, academics, and students.

Community Care for Health Professionals presents information needed by health professionals for an effective transitioning from institutional to community-based care. The book is comprised 12 chapters that are organized into two parts. The first part covers social policy and various issues, including legal, sociological, and psychological issues. The second part covers the skills required for a successful community practice, such as working with individuals, families, and groups. The text will be of great use to health professionals who are working in the community or have plans to do so.

This book examines issues across the lifespan of transgender and nonbinary individuals whilst synthesizing conceptual work, empirical evidence, pedagogical content, educational experiences, and the voices of transgender and nonbinary individuals. It highlights the resilience and resistance of transgender and nonbinary individuals and communities to challenge narratives relying on one-dimensional perspectives of risk and tragic lives. While there is currently unprecedented visibility and increasing support, members of these communities still face shockingly high rates of violence,

victimization, unemployment, discrimination, and family rejection. Significant need for services and support coupled with social, clinical, and medical service systems ill-equipped to provide culturally responsive care illustrates the critical need for quality education and training of educators, practitioners, and service providers in best practices of working with members of the transgender and nonbinary community. Organized into six sections: Health Areas of Practice Coming Out and Family Relationships and Sexuality Communities Multiply Marginalized Identities and Populations, this book offers a current, comprehensive, and intersectional guide for students, practitioners, and researchers across a variety of professions, including social work, psychology, public policy, and health care.

This third edition of *Community Care Practice and the Law* has been substantially rewritten and restructured to reflect the rapid legal and policy changes affecting the community care field. It provides comprehensive and jargon-free explanations of both community care legislation and other areas of the law directly relevant to practitioners. Topics covered include: • assessment and eligibility criteria (‘fair access to care’) and waiting times • placing people in care homes • non-residential, domiciliary and home care services • carers’ assessments and services • home adaptations and disabled facilities grants * direct payments * continuing health care and health services generally, including community equipment services * joint working between local authorities and the NHS * single assessment process, intermediate care * decision making capacity and incapacity * information sharing * adult protection * human rights and disability discrimination * health and safety at work legislation including manual handling people subject to immigration control, including asylum seekers care standards. Numerous examples of legal cases and ombudsman investigations clearly illustrate the practical impact of legislation on community care. A separate chapter provides an at-a-glance view of the whole range of

legislation underpinning the everyday work of practitioners. The author also identifies the underlying mechanisms, tensions and problems affecting community care law and practice. Primarily covering England in detail, much of the legal case law covered and the legal principles involved are of general relevance across the United Kingdom, and where material is not directly applicable to Wales, Scotland and Northern Ireland, short summaries offer general pointers for the position in these three countries. This book is an essential guide for practitioners and managers in both the statutory and voluntary sectors, policy makers in local and central government, advocates, lawyers and social work students.

Communities of Practice in Health and Social Care highlights how communities of practice (CoPs) can make service development and quality improvement in health and social care easier to initiate and more sustainable. Using a series of case studies from the UK and Australia the book demonstrates how the theory of CoPs is implemented in the delivery of health and social care and highlights the associated potential, complexities, advantages and disadvantages. Communities of Practice in Health and Social Care equips practitioners, managers, educators and practice mentors with the knowledge and skills to facilitate the development and maintenance of Communities of Practice and highlights how the effects of Communities of Practice might be made explicit.

Published in 1993. Valid and useful costings in social and health care depend not only on a knowledge of costing theory but also on overcoming the practical difficulties involved. The authors of this book draw on eighteen years of research at the Personal Social Services Research Unit (PSSRU) to describe the theory and practise of costing, and its uses. Costing Community Care differs from other books which address the subject, by acknowledging and discussing the practical difficulties of costing, and by

examining in detail the interface between theory and practice. Principles and methodologies are identified, and pragmatic approaches to achieving valid data in the face of practical difficulties are described. Examples from empirical research are used to illustrate particular issues and four case studies are included which reflect a variety of methodologies and policy issues.
