Miele convection-steam ovens combine all the functions of a fully-fledged convection oven with those of a steam oven. However, the Miele convection-steam oven best shows its competencies in the combination programs, where both convection and steam are used to achieve bakery-quality results and moisture-rich meats.

and 'Bottling or Canning'. We are republishing this vintage text now in an affordable, modern edition - complete with a specially commissioned introduction on food preservation.

America's urbanites have engaged in many tumultuous struggles for civil and worker rights since the Second World War. In *Whose Detroit?*, Heather Ann Thompson focuses in detail on the struggles of Motor City residents during the 1960s and early 1970s and finds that conflict continued to plague the inner city and its workplaces even after Great Society liberals committed themselves to improving conditions. Using the contested urban center of Detroit as a model, Thompson assesses the role of such upheaval in shaping the future of America's cities. She argues that the glaring persistence of injustice and inequality led directly to explosions of unrest in this period. Thompson finds that unrest as dramatic as that witnessed during Detroit's infamous riot of 1967 by no means doomed the inner city, nor in any way sealed its fate. The politics of liberalism continued to serve as a catalyst for both polarization and radical new possibilities and Detroit remained a contested, and thus politically vibrant, urban center. Thompson's account of the post-World War II fate of Detroit casts new light on contemporary urban issues, including white flight, police brutality, civic and shop floor rebellion, labor decline, and the dramatic reshaping of the American political order. Throughout, the author tells the stories of real events and individuals, including James Johnson, Jr., who, after years of suffering racial discrimination in Detroit's auto industry, went on trial in 1971 for the shooting deaths of two foremen and another worker at a Chrysler plant. Bringing the labor movement into the context of the literature of Sixties radicalism, *Whose Detroit?* integrates the history of the 1960s into the broader political history of the postwar period. Urban, labor, political, and African-American history are blended into Thompson's comprehensive portrayal of Detroit's reaction to pressures felt throughout the nation. With deft attention

to the historical background and preoccupations of Detroit's residents, Thompson has written a biography of an entire city at a time of crisis.

THROUGHOUT ERICA HELLER'S LIFE, when people learned that Joseph Heller was her father, they often remarked, "How terrific!" But was there a catch? Like his most famous work, her father was a study in contradictions: eccentric, brilliant, and voracious, but also mercurial, competitive, and stubborn, with a love of mischief that sometimes cut too close to the bone. Being raised by such a larger-than-life personality could be claustrophobic, even at the sprawling Upper West Side apartments of the Apthorp, which the Hellers called home—in one way or another—for forty-five years. *Yossarian Slept Here* is Erica Heller's wickedly funny but also poignant and incisive memoir about growing up in a family—her iconic father; her wry, beautiful mother, Shirley; her younger brother, Ted; her relentlessly inventive grandmother Dottie—that could be by turns caring, infuriating, and exasperating, though anything but dull. From the forbidden pleasures of ordering shrimp cocktail when it was beyond the family's budget to spending a summer, as her father's fame grew, at the Beverly Hills Hotel, Erica details the Hellers' charmed—and charmingly turbulent—trajectory. She offers a rare glimpse of meetings with the Gourmet Club, where her father would dine weekly with Mel Brooks, Zero Mostel, and Mario Puzo, among others (and from which all wives and children were strictly verboten). She introduces us to many extraordinary residents of the Apthorp, some famous—George Balanchine, Sidney Poitier, and Lena Horne, to name a few—and some not famous, but all quite memorable. Yet she also manages to limn the complex bonds of loyalty and guilt, hurt and healing, that define every family. Erica was among

those present at her father's bedside as he struggled to recover from Guillain-Barré syndrome and then cared for her mother when Shirley was diagnosed with terminal cancer after the thirty-eight-year marriage and intensely passionate partnership with Joe had ended. Witty and perceptive, and displaying the descriptive gifts of a born storyteller, this authentic and colorful portrait of life in the Heller household unfolds alongside the saga of the family's moves into four distinctive apartments within the Apthorp, each representing a different phase of their lives together—and apart. It is a story about achieving a dream; about fame and its aftermath; about lasting love, squandered opportunities, and how to have the best meal in Chinatown.

This volume is a post-event proceedings volume and contains selected papers based on the presentations given, and the lively discussions that ensued, during a seminar held in Dagstuhl Castle, Germany, in October 2003. Co-sponsored by ECVision, the cognitive vision network of excellence, it was organized to further strengthen cooperation between research groups from different countries working in the field of cognitive vision systems.

In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, *Notes from the Hyena's Belly* offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

Hock the platinum. Take down the vacation photos. Cancel the joint checking account. There's no question . . . Divorce Sucks. And perhaps no one knows that better than author Mary Jo Eustace, whose ex-husband Dean McDermott married Tori Spelling a mere thirty days after their divorce was finalized. One part tell-all and one part guide to get readers on their feet after a bitter breakup, this hilarious addition to the bestselling Sucks series tells everything readers don't want to know about divorce - from what a phone call with a lawyer will cost; to how to handle your newer, younger replacement; to what Hollywood divorcees are actually thinking when they watch their ex walk the red carpet with a millionairess. Sometimes horrifying, sometimes gratifying, and never merciful, this book will give readers an inside look at one of today's most public divorces while reminding them - hey, it could always be worse.

A New York Times essayist shares her journey from a self-destructive college student to a devoted family woman and teacher while illuminating the importance of trusting in a higher power and being truthful about life's challenges.

Energy Worlds in Experiment is an experiment in writing about energy and an exploration of energy infrastructures as experiments. Twenty authors have written collaborative chapters that examine energy politics and practices, from electricity cables and energy monitors to swamps and estuaries. Each chapter proposes a unique format to tell energy worlds differently and to stimulate energy imaginaries: thesis, propositions, interviews, stories, card games, and a graphic novel. The book offers practitioners, students, and scholars a range of new tools to help think, engage and critique energy politics, practices

Developers who want to access USB devices from their embedded systems will find a helpful resource in *USB Embedded Hosts: The Developer's Guide*. This new book from the author of *USB Complete* shows how small systems can take advantage of the same wealth of USB devices available to conventional PCs. The book begins with a review of USB host communication protocols. Readers then learn which USB host requirements are relaxed for embedded systems and what new requirements some embedded systems must meet. To help in selecting a development platform, the book explores available hardware and software for USB host communications in small systems. The heart of the book focuses on communicating with USB devices. The topics (with example code) include USB drives, keyboards, virtual serial ports, network bridges, mics, speakers, video cameras, and printers, plus devices that don't fit defined USB classes. Also discussed are systems that support both USB host and device functions. The example code is written for the BeagleBoard-xM open development board using a distribution of Linux targeted to small systems. Also covered is how to use Linux commands and utilities to learn about, monitor, and debug communications with USB devices.
