This IBM® Redbooks®  
publication focuses on  
developing Web service  
applications in IBM CICS®.  
It takes the broad view of

# File Type PDF Perspectives On Web Services Applying

developing and modernizing  
CICS applications for XML,  
Web services, SOAP, and SOA  
support, and lays out a  
reference architecture for  
developing these kinds of  
applications. We start by  
discussing Web services in

# File Type PDF Perspectives On Web Services Applying

general, then review how  
CICS implements Web  
services. We offer an  
overview of different  
development approaches:  
bottom-up, top-down, and  
meet-in-the-middle. We then  
look at how you would go

about exposing a CICS application as a Web service provider, again looking at the different approaches.

The book then steps through the process of creating a CICS Web service requester. We follow this by looking at

File Type PDF Perspectives  
On Web Services Applying  
CICS application aggregation  
(including 3270  
applications) with IBM  
Rational® Application  
Developer for IBM System z®  
and how to implement CICS  
Web Services using CICS  
Cloud technology. The first

part is concluded with hints and tips to help you when implementing this technology. Part two of this publication provides performance figures for a basic Web service. We investigate some common

variables and examine their  
effects on the performance  
of CICS as both a requester  
and provider of Web  
services.

We have described the  
development of a new micro-  
payment system, NetPay, f-  
turing different ways of  
managing electronic money,

or e-coins. NetPay provides  
an off-line, anonymous  
protocol that supports high-  
volume, low-cost electronic  
computing over the  
Internet. We developed three  
kinds of e-wallets to manage  
coins in a NetPay-based

system: a sever-side e-wallet allowing multiple computer access to- coins; a client-side e-wallet allowing customer PC management of the e-coins, and a cookie-based e-wallet cache to improve performance

of the client-side e-wallet

Experiences to date with  
NetPay prototypes have

demonstrated it provides an  
effective micro-payment  
strategy and customers  
welcome the ability to
