Rational Root Theorem

The Rational Root Theorem says if a polynomial equation $a_n x^n + a_{n-1} x^{n-1} + \dots + a_1 x + a_0 = 0$ has rational root $\frac{p}{q}$ ($p, q \in \mathbb{Z}$) then the denominator q divides the leading coefficient and the numerator p divides a_0 . As an addition to this theorem, for every whole number k , number $p - k$?
