"Gentry and Ouellette are cannonballing into the reading research pool, they're making waves, and these waves are moving the field of reading forward." --From the foreword by Mark Weakland, *Super Spellers* The past two decades have brought giant leaps in our understanding of how the brain works. But these discoveries--and all their exciting implications--have yet to make their way into most classrooms. With the concise and readable *BrainWords*, you will learn how children's brains develop as they become readers and discover ways you can take concrete steps to promote this critical developmental passage. Introducing their original, research-based framework of "brain words"--dictionaries in the brain where students store and automatically access sounds, spellings, and meanings--the authors offer a wealth of information that will transform your thinking and practice: Up-to-date knowledge about reading and neurological circuitry, including evidence that spelling is at the core of the reading brain Tools to recognize what works, what doesn't, and why Practical classroom activities for daily teaching and student assessment Insights about what brain research tells us about whole language and phonics-first movements Deepened understanding of dyslexia through the enhanced lens of brain science With the insights and strategies of *BrainWords*, you can meet your students where they are and ensure that more of them read well, think well, and write well.

Test with success using *Spectrum Word Study and Phonics* for grade 6! The lessons encourage creativity and strengthen phonics skills by focusing on digraphs, diphthongs, syllabication, acronyms, figures of speech, and dictionary skills. The book features full-color illustrations, provides essential tools for achieving reading fluency, and includes an answer key. Today, more than ever, students need to be equipped with the skills required for school achievement and success on proficiency tests. This 168-page book aligns with state and national standards, is perfect for use at home or in school, and is favored by parents, homeschoolers, and teachers.

It's been a decade since Lynne Dorfman and Rose Cappelli wrote the first edition of *Mentor Texts* and helped teachers across the country make the most of high-quality children's literature in their writing instruction. In the second edition of this important book Lynne and Rose show teachers how to help students become confident, accomplished writers by using

## Get Free Spelling Connections Grade 7 Answers

literature as their foundation. The second edition includes brand-new "Your Turn Lessons," built around the gradual release of responsibility model, offering suggestions for demonstrations and shared or guided writing. Reflection is emphasized as a necessary component to understanding why mentor authors chose certain strategies, literary devices, sentence structures, and words. Lynne and Rose offer new children's book titles in each chapter and in a carefully curated and annotated Treasure Chest. At the end of each chapter a "Think About It--Talk About It--Write About It" section invites reflection and conversation with colleagues. The book is organized around the characteristics of good writing--focus, content, organization, style, and conventions. Rose and Lynne write in a friendly and conversational style, employing numerous anecdotes to help teachers visualize the process, and offer strategies that can be immediately implemented in the classroom. This practical resource demonstrates the power of learning to read like writers.
